Cephalanthera damasonium
Clinopodium vulgare
Prunus avium
Sorbus torminalis
Fragaria vesca
Eranthis hyemalis
Brachypodium sylvaticum
Melica uniflora

NOTES AND ADDITIONS

PLANTED TREES

Ravenshill Wood was clear-felled in 1929 and then neglected, reverting to an impenetrable jungle. It was decided to retain as much as possible of the natural forest community: and to plant other trees, including conifers, in those areas where no self-grown timber was likely to do well: or just to add interest and variety.

The following were therefore planted between 1942 and 1970:

Broad-leaved Trees
Castanea sativa Sweet Chestnut (a few behind toilet block)
Fagus sylvatica Common Beech (below the Look-Out Tower)
Hybrid Black Poplars many different crosses, including "Robusta" and "Serotina" - grown mainly for the match-trade - several acres in the marshier areas, visible from the Centre and the pool
Quercus borealis Red Oak (in centre of Picnic slope) or rubra
Conifers
Chamaecyparis Lawson Cypress (a few only, on left of lawsoniana track between Blue Stop 4 and Look-Out Tower)
Larix kaempferi x Hybrid Larch (oldest stand on left, approaching Blue Stop 5: younger trees behind Picnic slope at entrance; a few around the pool area and elsewhere)
Norway Spruce, Christmas Tree (small plantation on left, just past Blue Stop 7: others scattered elsewhere)
Picea abies
Picea sitchensis Sitka Spruce (top of wood between Blue Stops 5 & 6; a few on right, just before Blue Stop 8)
